DATA SCIENTIST

MSBA candidate and Computer Science and Artificial Intelligence graduate specializing in machine learning, reinforcement learning, and applied LLM systems. Shipped contextual bandit personalization, automated root cause analysis, and retrieval-augmented search into production at Flipkart and Shaadi.com. National hackathon winner, 1st of 1,000+ teams, fluent in Python, SQL, and PyTorch.

EDUCATION

Wake Forest University School of Business, Winston-Salem, NC

Master of Science in Business Analytics, May 2027

Honors: Havells Scholar

Plaksha University, Mohali, India

Bachelor of Technology in Computer Science and Artificial Intelligence, May 2026 | CGPA: 8.75/10

Honors: Airtel Bharti Scholar, 1 of 20 selected for academic excellence; Times Scholar, top 200 of 300,000+ applicants

AREAS OF EXPERTISE

Predictive Modeling | Experimental Design | Statistical Inference | Recommendation Systems | Data Storytelling
Stakeholder Engagement | Cross-functional Collaboration | Problem Framing | Team Leadership | Technical Writing

TECHNICAL SKILLS

Programming Languages: Python, SQL, C++, R

Machine Learning & Statistics: Contextual Bandits, Regression, Classification, Clustering, A/B Testing, Hypothesis Testing, Scikit-learn, PyTorch, TensorFlow

LLM & Agentic Systems: RAG, LangGraph, LangChain, ReAct Agents, MCP, Prompt Engineering, LLM Evaluation, FAISS

Data & Deployment: Pandas, NumPy, ETL Pipelines, PostgreSQL, MySQL, FastAPI, Next.js, Streamlit, AWS, Git

PROFESSIONAL EXPERIENCE

Flipkart Internet Pvt Ltd, Bengaluru, India

Jan 2026 - Jun 2026

Business Analyst | Received Pre-Placement Offer

- Designed and built an automated Root Cause Analysis framework in Python covering 10+ business metrics, integrating enterprise data sources through MCP tools and reducing analysis time from 8 hours to 5 minutes
- Architected a 7-agent supervisor system in LangGraph with persistent memory, enabling context-aware multi-turn diagnostic conversations delivered to analysts through a Next.js and FastAPI interface
- Quantified brand visibility against competitors through weekly Share of Voice analysis across YouTube and digital platforms, informing marketing spend allocation
- Modeled hyperlocal demand and location viability to support dark store expansion, translating geospatial and demographic data into ranked site recommendations for network planning

Shaadi.com, Mumbai, India

May 2025 - Jul 2025

Data Science Intern

- Engineered a reinforcement learning contextual bandit framework to personalize premium plan discounts, estimating feature-level user rewards across demographic segments and lifting conversion rates
- Built an offline simulation environment to validate policy changes against historical data before production rollout, cutting the risk and cycle time of pricing experiments
- Deployed an A/B/C testing framework in Python and Scikit-learn to statistically evaluate pricing strategies and drive iteration on live revenue decisions

ANALYTICAL PROJECT EXPERIENCE

GitHub Semantic Search Engine: Built a retrieval-augmented semantic search engine over 5,000+ code repositories, generating SentenceTransformers embeddings indexed in FAISS for low-latency vector queries; improved search relevance by 80% and deployed with FastAPI and Streamlit

VoiceGPT, AI-Powered Screen Reader: Developed a voice-enabled assistant that lets visually impaired users navigate webpages conversationally, combining semantic DOM parsing, context-aware prompting, and speech recognition with local fallback for reliability

LEADERSHIP AND HONORS

- Winner, Hack the Future (2025):** 1st of 1,000+ teams at the MoSPI-sponsored national hackathon at IIT Gandhinagar
- Top 30, Innovate with GoIStats (2025):** Top 1.1% of 2,650+ nationwide entries judged by MoSPI and MyGov
- Tech Lead, Girls and Women in STEM, Plaksha University:** Organized technical workshops for 150+ students
- Election Commission Member, Plaksha University:** Administered student council elections for 600+ students
